Construction Information Services (CIS) is Ireland’s market leader in supplying construction project information across All-Ireland. We provide real time, in-depth information on construction projects from pre-planning to on-site stages. Our innovative online product ensures your business can make important decisions quickly and generate all specific leads for your pipeline.

CIS Online is compatible with all mobile and tablet devices meaning our customers always have the latest project opportunities with them no matter where they are. CIS Online is designed to let you dictate the criteria for your desired project leads based on what construction sectors you’re focused on as well as location, project stage and value range.

For all the latest updates on all projects listed in this report, simply click on the hyper-linked Project ID associated with it which will bring you to a CIS enquiry page where you can request further information.

Alternatively you can sign up for a Free 7 Day Trial where you can view these and all other major and minor projects that are or will be taking place in the Docklands area.

*Important note*
Estimated construction costs as indicated are indicative cost estimates. These costs are not exact and are intended only as a preliminary guide to possible project cost. Costs are derived from a building model with basic components. The indicative cost index has been produced with the assistance and validation of credible and qualified quantity surveyors. CIS shall have no liability for any loss, expense or damage arising out of or in connection with the information contained herein.

The information contained in this CIS Docklands Report is accurate as of 14th September 2015. Future updates on all of these projects can be accessed via our online database by signing up for a Free 7 Day Trial, and thereafter a paid subscription.

Dublin Docklands Timeline and History

- Custom house built - 1790s
- Urban Renewal Act established - 1986
- IFSC was established – 1987
- Custom House Docks Planning Scheme prepared – 1994
- Dublin Docklands Development Authority – 1997
- Preparation of 3 Master Dockland development plans – 1997-2008
- Introduction of the Strategic Development Zone Scheme – 2014

The Dublin Docklands Development Area comprises of 520 hectares or 1300 acres of land on the north and south banks of the River Liffey.

A brief history of the Dublin Docklands

The traditional Dublin industries, such as poplin and silk were located in the neighbourhood of St. Patrick’s Cathedral. When these industries declined after 1800, the population fell in older parts of the city. In the Docklands by contrast the population increased steadily throughout the nineteenth century, and the vacant land was gradually covered with houses and commercial properties.

Following the decline of textile industries in Dublin after 1800, population numbers fell in older parts of the city. But due to the increase in the city’s port trade which operated in front of the Custom House when it opened in the 1790s, the vacant land around the docklands gradually became covered with houses and commercial properties.

After World War II the number of jobs in the Docklands fell with the growth of container traffic and the switch from rail to road. Many of the older factories closed down.

Moving the Docklands into the modern age

Previous regeneration of the docklands began in the late ‘80s with the development of the International Financial Services Centre (IFSC). The IFSC is now one of the world’s leading financial services centres. It has become one of the leading hedge fund service centres in Europe, and many of the world’s most important financial institutions have a presence here.

Total employment in the IFSC stands at over 35,000 with 10,000 people employed outside Dublin and pay about €1 billion in corporate taxes each year, with a further €1 billion going to the exchequer in payroll taxes. More than 500 operations were approved to trade in under the IFSC programme. The centre is host to half of the world’s top 50 banks and to half of the top 20 insurance companies. A sophisticated support network, including shared services centres, software development, and legal and accountancy companies, has also developed around the IFSC.

Following the economic crash, the IFSC suffered extreme financial contraction but some of the major construction projects continued on and today, new infrastructure, such as the Samuel Beckett Bridge and the LUAS Docklands extension, has made the area more accessible. New venues, including the Bord Gais Energy Theatre, the refurbished 3Arena and the Convention Centre Dublin have all become modern Dublin landmarks. With the mass of commercial, residential, civil and leisure projects in the pipeline for the SDZ Docklands Planning Scheme, this has become and will continue to be a vibrant working and living district in the city of Dublin.
Future Development of the Docklands

The Dublin Docklands Development Authority was established in 1997 to lead a major project of physical, social and economic regeneration in the East side of Dublin. The preparation of three Master Dockland development plans between this time and 2008 established the following planned schemes which have since been approved.

**North Lotts Planning Scheme**

The North Lotts and Grand Canal Dock SDZ Planning Scheme was approved by Dublin City Council in 2014 and by An Bord Pleanala in 2014, subject to minor amendments.

The 13.2 hectares of undeveloped sites could accommodate c.1,950 residential units and 200,000m² of commercial floor space.

**Grand Canal Dock Planning Scheme**

The 9.6 hectares of undeveloped sites could accommodate c. 1,400 residential units and 145,000m² of commercial floor space.
**Poolbeg Planning Scheme**

Overall, the potential development floorspace within will be in the region of 750,000 square metres. This equates to a potential residential population of 10,100 people and potential working population of 16,000 people.

**Custom House Docks Planning Scheme**

The Customs House Docks area comprises 29.85 hectares situated on the north side of the River Liffey.

**Docklands facts**

- The restored chq building is the last surviving warehouse of the Docklands. This structure once hosted a banquet for 4,000 veterans of the Crimean War in 1856.
- 300 years ago there were no houses in the Docklands with the exception of the small fishing hamlet of Ringsend. Most of the land was underwater with the occasional watchtower, customs outpost and pilgrimage hospice along the waterfront.
- Over 40,000 are employed in the Dublin docklands area and almost 30,000 people live in residential units here.
Mixed Use Development

1-4 Windmill Lane, 1-3 Hanover Street East, & 19-20 Creighton Street, Dublin

CIS Project ID: 133674

We understand a main contractor is expected to be appointed in Q4 2015/Q1 2016 for the construction of a mixed use development on 1-4 Windmill Lane. Piling and excavation works are currently underway on this development. Demolition works undertaken by Walmac Construction, Co. Dublin were completed in Q1 2015.

The overall development consists of the demolition of existing warehouse buildings, the retention of no. 19 Creighton Street and the development of a mixed use development consisting of a 4 to 6 storey office building including setback penthouse levels with roof terraces at 3rd floor level, ground floor cafe and associated rooftop plant. A 4-5 storey residential building with retail space at ground floor and residential development on the upper floors around a raised first floor level landscaped courtyard providing 15 no. units consisting of 3 no. 1 bed units, 8 no. 2 bed units & 4 no. 3 beds with associated balconies and roof terrace at 5th floor.

At ground floor level pedestrian access is proposed to the offices from Windmill Lane. Access to the residential units is provided along Creighton Street and access to the residential courtyard is provided along Creighton Street & Hanover Street East. The development also proposes an ESB substation above flood level. 58 car parking spaces, 214 bicycle spaces and associated plant space are provided in a single basement car park accessed via a new vehicular ramp off Hanover Street East.

The total gross floor areas provided are as follows: 13,980 sq.m. of office, 887 sq.m. of retail & 1678 sq.m. of residential combining for an overall proposed development of 16,545 sq.m. (Excluding basement). All the above, including all associated ground and landscaping works is to be carried out on a site of 0.4223 ha.

Work is expected to take in the region of 24 months to complete.

Main contractor Walls Construction, Co. Dublin are currently carrying out the complete construction of the partially built reinforced concrete structure, located on North Wall Quay (NWQ), Dublin 1, and fit-out for a quality specification, fit for purpose office building that will accommodate Central Bank of Ireland city centre operations and personnel in one centralised location. The existing building is an 8 storey building over double basement, with a gross internal floor area of circa 37,000sqm, (which includes circa 12,000sqm of double basement) with provisions for car park, access ramp, flood defences, pavement upgrade works and general external works.

Work will include the following, amongst others: 1. Install piling foundation / drainage / attenuation tanks / floor slabs and any underground services. 2. Construct basement ramp / basement levels / perimeter wall 3. Complete construction of structural frame at roof level and undertake minor structural alterations at each floor level 4. Design and installation of façade to ensure the building envelope is an extremely high standard. 5. Fit-out of all Floor Plates to client’s requirements, including M&E installation, catering, IT/AV, security and other specialist installation, 6. Complete all ancillary external / site work including high quality hard and soft landscaping.

Construction work is expected to take in the region of 18 months to complete. It is estimated that total development costs for the project will be in the region of €140 million.

The overall development, which will accommodate the Central Bank of Ireland head office, will consist of amendments to the previously permitted developments (An Bord Pleanála reference pl 29n.232580/ Dublin City Council register reference 4964/08 and Dublin City Council register reference 2948/12) principally comprising revisions to the internal arrangement of existing and previously permitted office workspace and related ancillary floor space; revised internal lift core, atrium and stair arrangements and revised landscaping, boundary and elevation treatments. The amendments will include: modifications to the basement levels -2 and -1 compromising revised bicycle parking provision; a new bicycle parking access stair on the eastern elevation of the building to basement level -1; minor adjustments to the vehicular entrance ramp; the omission of the permitted auditorium and replacement with ancillary office support floor space; revised ancillary staff areas and new office support floor space.

The development will also include modifications to the other permitted floors as follows: ground floor level including the re-location of the permitted staff restaurant to the first floor and its replacement with exhibition and multi-purpose meeting area; revised public reception and teller area; office and associated support space and amendments to the pedestrian entrance to the exhibition space from New Wapping Street; first floor level including the provision of a staff restaurant (in lieu of part of the permitted office area) and new office floor space; second to seventh floor levels including the provision of additional stair and bridge connections within the atrium.

The development will also consist of changes to the previously permitted elevations including new facade treatments and canopy; amendments to the previously permitted hard and soft landscaping; the provision of temporary security gates and boundary fencing; minor revisions to the previously permitted foul and surface water drainage arrangements to the building; 3 no. flagpoles; retractable bollards; cctv and lighting; roof plant screening and enclosure and all ancillary site development and excavation works above and below ground.

The proposed development will have an overall total gross internal floor area of 29,358 sq m (including basement), which is an increase of 510 sq m over the previously permitted development. The overall height of the building remains unchanged.

The permitted development under reg. ref: 1057/08 comprises of the demolition of all existing structures on the site, with the exception of the protected structures at nos 4 and 5 Sir John Rogerson’s Quay and the facade at no. 2 Sir John Rogerson’s quay, and the construction of a six storey mixed use development, comprising of office floors space, own door office/retail floors space, retail/cafe floors space, and retail floor space.

The proposed amendments to the permitted development comprise of the following; amendments to the north, west and south elevations, including revised proposals for the retained facade at no. 2 Sir John Rogerson’s quay and the provision of an increased courtyard space to the north elevation, with the proposed new building setback from the facade of no.2; relocation of permitted substation from the corner of Creighton street and Windmill Lane to a new location on Creighton street; amendments to internal layouts on all floors (ground to fifth floor), amendments to core location and layout, and omission of central atrium; marginal increase in floor to ceiling height over each of the permitted 6 no. floors resulting in an increase in overall height of the permitted development. There will be no increase in the permitted number of storeys; amendment to basement layout, omission of permitted basement access ramp from Windmill lane and use of existing basement access ramp to the adjoining observatory building to access the proposed development; revised design for the reinstatement of no. 6 Sir John Rogerson’s quay.

Change of use of the permitted cafe (51 sq.m gross), restaurant (51.6 sq.m gross) and class1/class 2 commercial unit (40 sq.m gross) at ground floor of nos 4, 5 and 6 Sir John Rogerson’s Quay, respectively, to office use, and provision of connections between nos 4, 5 and 6 Sir John Rogerson’s quay; change of use of the permitted first, second and third floors of nos 4, 5 and 6 Sir John Rogerson’s quay from 3 no. live/work units to office use (893.5 sq. m gross); provision of a link at ground, first and second floor level between no. 4 Sir John Rogerson’s Quay and the permitted development to the rear (south); omission of 4 no. class 1/ class 2 commercial units (circa 250.5 sq.m gross in total) at ground floor level to Creighton street and the provision of an own door office/retail unit to Creighton street (circa 94.5 sq.m gross) It also includes a retail/cafe unit (circa 220 sq.m gross) on the corner of Creighton street and Windmill Lane and 2 no. retail units (of circa 168 and 100 sq.m gross) on Windmill lane; omission of setback at permitted fourth floor level to Windmill lane and alterations to setback at fifth floor level; revisions to permitted basement layout to provide 26 no. car parking spaces, 205 no. bicycle parking spaces, showers, lockers, plant and associated facilities; all associated and ancillary works.

The proposed amended development will comprise of a marginal decrease in floor space from 13,700 sq.m gross floors space to circa 13,188.5 sq.m, comprising of circa 12,606.2 sq.m of office floor space, circa 94.5 sq.m of own door office/retail floor space, circa 220 sq.m of a retail/cafe floor space, and circa 268 sq.m of retail floor space.

The proposed development generally comprises the partial removal and reconfiguration of an existing two level basement and the construction of a mixed-use development with a gross internal area above ground of c.60,589.6 sq m (gfa), including 7 no. blocks (blocks a - g) ranging in height from 3 to 19 storeys to accommodate: c.35,690 sq m (gfa) office floor area (blocks a,b & c) inclusive of atrium space; c.17,561.9 sq m residential floor area (blocks d, e & f) delivering 204no. Apartments (34no. 1-beds, 140no. 2-beds and 30no. 2/3 beds); together with retail units (blocks e, f); cultural use (block e, f), residential amenity services (block e, f), a crèche (block d) and restaurants (block d, f, g).

Two levels of basement (c.23,781 sq m gfa) will accommodate 391no. car parking spaces, 650no. bicycle parking spaces, changing/shower/toilet facilities, storage, services and plant areas. Landscaping will include a new public square (located between block e & g) and public open space along Britain quay of the site with improved pedestrian connections.

Blocks A and B are adjoining office buildings (8-storeys each), located immediately east of the existing state street bank building and south of Sir John Rogerson’s Quay. Total gross floor area amounts to c.25,227 sq m, including a central atrium. These buildings will accommodate office use and ancillary facilities over all floor levels, open terrace at level 7 on northern elevation and plant at level 7. block C, office building (8-storeys), located in the southern part of the site bounded by green street east. total gross floor area amounts to c.10,463 sq m block c connects with block b at levels 1 to 7.

This building will accommodate office use and ancillary facilities over all floor levels; roof terrace at level 6 on southern elevation; balcony at level 7 on southern elevation, as well as plant at level 7. block d, residential building (10 - storeys), located immediately south of the existing state street bank building and bounded by Benson street and green street east.

Total gross floor area amounts to c.5,201.7 sq m, accommodating a crèche (c. 154.7 sq m), cafe/restaurant (c.90.6 sq m) and lobby at ground level; and 51no. apartments (14no. 1-bed, 26no. 2-bed, and 11 no. 2/3-beds); roof terraces at levels 1 & 8 and associated balconies for each apartment at levels 2 to 7 and at level 9. Block e, residential building (10 - storeys), located in the eastern part the site, bounded by Britain Quay. total gross floor area c.9,188.6 sq m providing for 67no. apartments (6no. 1-bed, 60no. 2-bed and 1no. 2/3-beds), with balconies and/or terrace for each apartment.

Block f, residential building (19 - storeys), located in the north-eastern part of the site, bounded by britain quay and sir john Rogerson’s quay. total gross floor area c.9,641.8 sq m providing 86no. apartments (14no. 1-bed, 54no. 2-bed and 18no. 2/3-beds) with balconies and/or terrace for each apartment. Blocks e & f are connected up to level 1 and also accommodate within their total gross floor area a cultural space (c.360.2 sq m), 4no. retail units (c.498.1 sq m overall) and 2no. cafe/restaurant units (c.539.5 sq m) all at ground floor, together with resident amenity facilities at level 1 (total c.940.6 sq m) including residents lounge (c.144.6 sq m), business suite (c.101.1 sq m), management suite (c.98.3 sq m), cinema room (c.46.4 sq m), gym (c.274.9 sq m) and conservatory (c.61 sq m). block g, pavilion building (3-storey), located in the south-eastern part of the site, bounded by Britain Quay and Green Street East.
Total gross floor area c.867.5 sq m, accommodating 2no. cafe/restaurants (c.384.7 sq m and c.269.8 sq m) over 3 floors and 2 floors respectively; with a terrace to the north and south of block g at level 1, and a roof terrace at level 2. Vehicular access to the basement car park is provided via the existing access on green street east currently serving state street bank; local access is accommodated within the scheme by the provision of a new street linking sir john rogerson’s quay and green street east.

All associated site development and landscape works, including provision of civic space and open space, boundary treatment, landscaping and service provision including funnel ventilation structures serving basement car park and also the partial removal and reconfiguration of an existing basement structure, with landscape works and boundary treatment proposed along sir john Rogerson’s quay (a protected structure); all on a site of c.1.93ha.

This application relates to a proposed development within the north lotts & Grand Canal dock strategic development zone planning scheme area. An environmental impact statement will be submitted to the planning authority with the planning application and will be available for inspection or purchase at a fee not exceeding the reasonable cost of making a copy at the offices of the planning authority.

We understand once a favourable decision is made by the Council, construction work is expected to commence in January 2016 and will take 14 months to complete.
For the development at a site of 1.056 ha known as the former Boland's Mill incorporating 33 & 34 Barrow Street together with 35a Barrow Street & 35 Barrow Street (car park) at Ringsend Road and Barrow Street, Dublin 4, bounded to the north by Ringsend Rd, east by Barrow Street and to the west by Grand Canal Dock.

Enabling and demolition works are expected to commence in Q3/Q4 2015. The overall project is expected to take in the region of 28 months to complete. Main construction works are expected to commence in Q1/Q2 2016.

The site accommodates 4 protected structures including; block b referred to as 1 Ringsend Road (rps 7377); block d comprising no’s 33 and 34 Barrow Street (rps 483, 484); two storey brick gables of warehouses to south of Boland’s Mill (the ‘factory’ building) (rps 485). These will be refurbished and incorporated into the overall development. there will be internal and external interventions to all protected structures. The development consists of: a mixed use scheme with a gross floor area above ground of some 36,759 sq. m. (comprising office (28,762 sq. m.), residential (42 no. units including 31 no. 2 bed units and 11 no. 3 bed units; 6,050 sq. m.), restaurant/cafe (1,184 sq. m.), retail (214 sq. m.) and cultural and exhibition (549 sq. m.) uses; provision of incidental parking, storage, plant and related uses at basement area of 11,477 sq.m. (overall gross floor area of scheme is some 48,236 sq. m.). the development includes 2 no. new build office buildings; 1 no. new build residential building; the restoration of existing blocks a, b, c, d and the redevelopment of the factory building. the proposed development includes the demolition of structures on the site, including the former silo structures (blocks e, f and g) as well as blocks h, j, k and l.

The detailed description of the development is set out below: 1. building a (2 storeys) located at the junction of Ringsend Rd. and Barrow St. will be retained and restored for retail (to include off licence use)/restaurant/cafe use. interventions to include: reinstatement of roof and window opes; new windows to be installed to match original on north and south facades; new entrance door to Ringsend Rd. facade and new doors to be installed in existing opes in south facade. 2. building b (comprising b1 - b5) (rps 7377) (5 - 8 storeys) located on ringsend rd. will be retained and restored for office use.

Restaurant/cafe/retail use to be provided at ground floor of b4 to b5. interventions to include: reinstatement of timber roof trusses and roofs, with lantern roof to roof to b5 (a later addition) to be removed; new win-dows to be installed on all facades to match original; window opes at ground floor north facade to be modified; new entrances to be provided on north and south elevations; removal of section of first floor to provide atrium; floors to be reinstated at original levels other than the removal of second floor in b3/b4 and the lowering of the existing ground floor in b4/ b5; new metal roof . enclosure to b3; removal of plant enclosure at roof level over b3, projecting canopy and associated ducts / equipment over former truck loading area on ringsend rd. and metal roof cowels to ducts over b4 & b5. 3. building c (6 storeys) fronting the dock will be retained and restored for restaurant/cafe/retail use at ground floor and residential above to include 9 no. 3 bed units and 1 no. 2 bed unit. interventions to include: replacement of later metal roof with natural slate roof; insertion of new floors; addition of new window opes on the w, n and s facades; enlargement of window opes on west facade to facilitate living spaces; addition of balconies to west elevation. 4. building d (rps 483, 484) (2 storeys plus basement) located on barrow street will be retained and restored for retail/cafe/ restaurant use. new glass and copper wrap around extension to existing building. interventions to include: refurbishment/repair of roof and windows; addition of glazed rooflight at rear wall; restoration of floors at original levels; internal fabric refurbishment; repair of steps and railings and front area to barrow street. 5. factory building (rps 485 two-storey brick gables):

It is proposed to partially demolish the rear of the factory building and reconstruct the east gables in a line that generally aligns with the footprint of the adjoining block c. the dockside gables will be restored. the factory building will accommodate cultural/exhibition use. interventions include: section of side walls to be removed; existing stone gabled east facade to be disassembled and reconstructed in its new position, including realignment of arched openings and windows and formation of new door; new viewing window to be formed in south facade; new rooflight; existing balcony on the waterfront facade to be replaced with new balcony and second matching balcony to be installed on western gable. 6. development to include all other associated internal and external works to blocks a, b, c, d and the
factory building. 7. new office building 1 is a 5 storey building fronting barrow street increasing to a maximum height of 14 storeys to accommodate (max. building height 53.65 m.) office accommodation and ancillary facilities including reception, meeting rooms and staff restaurant. enclosed plant area at level 13. roof terraces to be provided at floor levels 5, 11 and 12. 8. new office building 2 is a 5 storey building fronting barrow street increasing to a maximum height of 13 storeys (max. building height 49.85 m.) to accommodate office accommodation and ancillary facilities including reception, meeting rooms, plant and staff restaurant. roof terraces to be provided at floor levels 5 and 11. 9. new residential building 3 is a 15 storey building (max. building height 47.8 m.) accommodating reception and plant at ground floor, gym at first floor and 30 no. 2 bed units and 2 no. 3 bed units above. a semi enclosed roof terrace is provided at 14th floor. balconies on e, w, s elevations. 10. three new pedestrian routes from barrow street (two of which also provide for service and emergency vehicle access/egress).

New civic waterfront square adjacent to the dock. a bridge link along the dock is proposed connecting the square to Mc Mahon Bridge, Ringsend Rd. second open space to the south of the factory building. development to include all hard and soft landscaping, lighting and planting. 2no. new mooring points for vessels, along the Grand Canal Dock - East Quay Wall. 11. three levels of basement area are to be provided under buildings 1, 2 and 3 to accommodate 136 no. car parking spaces, 350 no. of bicycle spaces and ancillary locker and shower facilities and plant. basement to include lifts and stair cores. 12. development to include new replacement basement vehicular access/egress ramp from barrow street. this is the main exit and entrance to the basement car park. closure of existing basement ramp located adjacent to mason hayes curran building (south bank house). the new ramp will provide for continued vehicle access/egress to the existing south bank house car park which adjoins the subject site to the immediate south. 13. development to include demolition of existing esb substation located adjacent to the warehouse and dock and new additional internal substations, all site development and ancillary works.

An EIS was submitted to the planning authority with the planning application and the EIS will be available for inspection or purchase at a fee not exceeding the reasonable cost of making a copy at the offices of the planning authority. The application relates to a proposed development within a strategic development zone planning scheme area.

This application proposal is being made under the fast-track planning scheme for the Docklands - the Docklands Strategic Development Zone scheme. It is being submitted to the council by Savills, acting on behalf of NAMA. Boland’s Mill was previously owned by developer Seán Kelly’s Benton Properties and a Treasury Holdings company. It was sold to Benton Properties for €42m in 2004. It collapsed in value by 84% from €61m in 2007 to €9.9m in 2009, according to accounts filed with the Companies Office.

We understand that tenders are currently being assessed for the establishment of a multi-party framework agreement for design team services for opening bridges for the Dublin Docklands Area.

The Contracting Authority is seeking to establish a multi-operator framework agreement for the provision of integrated design team services for opening bridges for the Dublin Docklands Area. The framework agreement will be established with a minimum of three (3) and maximum of five (5) economic operators comprising the following disciplines; (a) Civil & Structural Engineering Services and associated specialist skills; (b) Architectural Services and associated specialist skills; (c) Mechanical & Electrical Engineering Services; (d) Quantity Surveying Services and associated skills; (e) Planning Consultancy Services and associated skills, and (f) Project Supervisor for the Design Process. The Integrated Design Team will be responsible for providing all construction related technical advice and design services to the Contracting Authority in respect of any contract awarded under the framework agreement. The maximum estimated value of services over the lifetime of the framework is in the region of €5 million. The framework will be established for a period of four (4) years. For the avoidance of doubt, the period for delivery of any contracts awarded under the framework may extend beyond that date of expiry of the framework agreement.

INITIAL CONTRACT: The framework agreement will be established on foot of an initial contract for the initial scheme concept and option selection, preliminary design, detailed design, planning application, procurement of works contractor, works supervision and handover of works for the Forbes Street pedestrian and cycle bridge. It is a requirement that this bridge is moveable/openable to allow navigation of the river by traffic both up and downstream. In addition, the historic and protected granite quay walls will require conservation works and adequate protection during construction.

According to reports bids to design a €12 million pedestrian and cycle bridge over the river Liffey are to be sought by Dublin City Council in the coming weeks. The bridge will be less than 250m from the Calatrava-designed Samuel Beckett Bridge. However, it will provide a more direct pedestrian link from the northside to the Grand Canal Docks and will relieve pressure on the Beckett bridge, Deirdre Scully, senior planner with the council’s docklands office, said. “The Samuel Beckett Bridge is extremely busy, particularly at rush hour times, and this new bridge will stop it from moving into over-capacity. It will also improve the flow to Grand Canal Square across the river, which will be particularly important if the Dart interconnector gets the go-ahead.” The new bridge will connect the old London and North Western Railway Company station on North Wall Quay to Forbes Street on Sir John Rogerson’s Quay on the south of the river and will be funded from levies collected through construction in the Dublin Docklands Strategic Development Zone (SDZ). The Victorian train station is the planned location of the proposed Dart Underground station. The Government has a month before planning permission expires on the underground line to decide whether it will go ahead. At €12 million, the bridge will be only €1.5 million cheaper than the most recently built bridge across the river, the Rosie Hackett Bridge, which opened last year. However, the Rosie Hackett Bridge carries buses and will, from 2017, carry Luas trams, while the new bridge will be for walkers and cyclists only.

A large part of the cost is due to the requirement for the bridge to open to allow boats to travel up the river, Ms Scully said. The bridge will also have the second-greatest span across the river at 125m, five metres more than the Samuel Beckett Bridge. The widest bridge is the East Link, which spans the river at its widest point (150m). Tenders for the design of the bridge, which will be advertised in the coming weeks, will be for a less dramatic look than the Samuel Beckett Bridge, Ms Scully said. The bridge is due to open in about three years. A second footbridge is proposed for further down the river, linking Sir John Rogerson’s Quay on the south side with Castleforbes Road on the north side. However there is no timeframe for the development of this bridge.

The application site includes the vacant former British rail hotel on 58-59 North Wall Quay, a protected structure (rps 5838), and associated granite walls, railings, gates, and adjoining setts in cul-de-sac, which are also protected structures (rps 5839).

The development consists of the following: - demolition of two existing buildings of 352 sq.m and 338sq.m respectively on the site to north wall quay, known as "Doyle's" building with an address at 63-64 North Wall Quay, dublin 1. - refurbishment of the former British Rail Hotel building (a protected structure) for use as a hotel and the provision of a new 8 storey building, including two setback storeys, plus roof plant to the rear of and connected to the existing British Rail Hotel building to provide an extension to the existing building and to provide a 169 number bedroom hotel with a total gross floor space of circa 6,243 sq.m (excluding ancillary areas at basement level), including restaurant, bar/lounge and conference facilities at ground floor level.

A separate retail unit of 32 sq.m gross and a separate craft unit of 95 sq.m at ground floor level of the new build element of the proposed hotel. The proposed works include the following: demolition of the existing single storey element between the east and west wings, interventions and amendments to the existing building including revisions to the internal layout including removal of existing fabric: repair and upgrade works to the existing structure including internal and external works, the provision of a new roof across the internal courtyard.

The provision of glazed walkway, links across the rear courtyard at first and second floor connecting the east and west wings of the existing building and connecting to the new building to the rear; the provision of a glazed bar/ lounge element at fifth floor level equivalent of circa 197 sq.m gross above the courtyard to the rear of the existing building to provide a transition between the existing building and the new extension. - construction of a 9 storey office building, including two setback storeys, plus roof plant, to the south-east corner of the site on the corner of North Wall Quay and New Wapping Street.

The total gross floor area of this building will be circa 21,255 sq.m. - construction of a part 6 part 7 storey mixed use building, including one setback storey, plus roof plant to the north of the site on the corner of mayor street upper and new wapping street.

The development comprises of 5 no. retail / restaurant / cafe units at ground floor area of 1,270 sq.m a unit of 169 sq.m gross for a community use, together with ancillary uses and circulation at ground floor level, and office floor space at first to sixth floor inclusive comprising of 15,925 sq.m, accessed via a reception area at ground floor level. The total gross floor area of this building will be circa 18,255 sq.m. - construction of two levels of basement beneath the site (excluding the area beneath the former british rail hotel) to serve the overall development, and to accommodate 149 no.car parking spaces, 660 no. bicycle parking spaces, plant staff facilities, storage areas and other associated and related facilities. Vehicular access to the basement will be via ramped access from new wapping street. The creation of a new north-south street and a new east-west street and a new east-west street through the site.

The southern portion of the new north south street between the hotel building and the office building to the south-east corner of the site will include a glazed canopy, with connections to the protected hotel structure. - extension of existing ( unnamed) cul-de-sac road between former british rail hotel building and existing woolstore building located to the west of the site to connect north wall quay and mayor street upper north-south. - Proposed hard and soft landscaping works, including public realm upgrade works along north wall quay, New Wapping Street and Mayor Street Upper. As part of the development there will be an external roof terrace at sixth floor level in block 7b to the east and south of the 5th floor roof.
In block 7d-2 there will be a roof terrace on the sixth floor to the north east and west and an external terrace at seventh floor to the south, east and west. Construction of external stairs and lift between the north and south buildings in the new street to provide access to the car park at lower basement level -1.

The proposed development includes all associated and ancillary works, including site development works. The proposed development comprises of a total proposed gross floor space of circa 47,753 sq.m comprising of circa 8,243 sq.m of hotel including the glazed bar / lounge area and associated uses, circa 39,510 sq.m office use, circa 1,270 sq.m gross of retail / restaurant floor space, circa 169 sq.m of community use, circa 95 sq.m of cafe use, and circa 32 sq.m gross of retail use, above 2 no. basement levels with a total gross floor space of 10,655 sq.m.

Coras Iompair Eireann are planning to undertake a public tender before the end of 2015 seeking development partners. Protected structure - córas iompair éireann intends to apply for a 10 year planning permission for the development of a 3.216 hectare site mainly comprising the existing cie car park, cie group buildings, rolling stock maintenance shed, and part of existing railway lines / sidings. the site is bounded by seville place and oriel hall to the north; sheriff street lower to the south; Oriel Street Upper to the east; and Connolly Station (protected structure) to the west, dublin 1.

The development will consist of the redevelopment of the site to provide a total of 81,538sqm of mixed commercial, residential (106 no. units, 3 no. one bed, 81 no. two bed, 22 no. three bed, community and leisure development comprising:

1. the demolition of the central train control, former fastrack, irish rail regional building maintenance, cie group it and hr buildings and the rolling stock maintenance shed currently on the site; and part demolition of vaulted warehouse buildings fronting sheriff street lower;

2. the excavation of 1.78 hectares of the site to -4.2 metres od to from a basement providing 550 no. car parking spaces (including 25no. disabled parking spaces, 260 no. cycle parking spaces, 4 no. coach parking spaces, plant areas, building service areas, storage and refuse storage facilities;

3. the construction of a new street through the site linking the existing vehicle access to the site on Sheriff Street Lower and a signalised junction to be constructed on Seville Place at the junction of Coburg Place;

4. the construction of an access street to connolly station from the new street through the site;

5. the construction of thirteen buildings comprising: block a - a six storey 7360sqm hotel building involving a four storey extension above the vaults of the former station luggage building (protected structure) to provide hotel bar / restaurant (968sqm) and community/cultural uses (572sqm) on street level fronting sheriff street lower; hotel reception, lounge, function areas and terraces at first floor; and 110 no. bedrooms hotel in the floors above;

block b/c - a five storey 5430sqm building involving a four storey extension above the existing vaults (protected structure) fronting sheriff street lower to provide retail (990sqm) and office uses (320sqm) on street level; cafe / restaurant (102sqm) and terrace and office use (1066sqm) on first floor; and 2984sqm of offices on second to fourth floors; block d - a five storey 7573sqm building with 543sqm retail / restaurant uses at street level and 7030sqm offices above;

block e - a six/seven storey 10913sqm building with retail/restaurant (665sqm) uses at street level and a leisure facility (1535sqm) at street and first floor level; 8735sqm offices above fronting onto the new street through the site; and east facing roof terrace at fifth floor and south facing roof terrace at sixth floor level; block f/g - a five storey 9642sqm office building above podium level partially over the existing railway lines/sidings comprising two blocks linked at three levels and including landscaped courtyards at podium level; block h - a seven storey 8104sqm office building fronting onto the new street through the site providing 1139sqm of retail / restaurant space at street level and 6965sqm office space above;
block i - a five/seven storey 13450sqm office building at the junction of seville place and the new street through the site and partially over the existing railway lines / sidings, including the formation of a south facing roof terrace at fifth floor level and an east facing roof terrace at sixth floor level; and the formation of a feature opening and windows in the existing boundary wall (protected structure) facing seville place;

block j/k - a four/five storey block providing 522sqm retail/restaurant and 940sqm community/leisure uses at street level and 33 no. two bedroom and 3 no. three bedroom apartments partially constructed over the vaults (protected structure) facing seville place including terraces to each apartment facing north west towards the new internal street, facing north east towards seville place and into the landscaped internal courtyard and the provision of children’s play area on the first floor roof on the southern elevation;

block l - a four/five/six storey block (recessed sixth level) providing 824sqm retail/restaurant uses at street level and 3 no. one bedroom, 23 no. two bedroom and 11 no. three bedroom apartments on the floors above including terraces to each apartment facing south west towards the new internal street and a roof terrace to each apartment on fifth floor level; and 4 no. two bedroom duplex apartments in two storey buildings in the internal courtyard;

block m - a two/three/five storey block providing 4 no. two bedroom live-work units at street level, 4 no. two bedroom apartments and 3 no. three bedroom apartment on the floors above including a terrace to each apartment on the north east elevation facing oriel street upper and the formation of window openings and entrances in the existing boundary wall on oriel street upper (protected structure);

block n - six storey block (recessed sixth level) providing 5 no. two bedroom live-work units and 87sqm of retail/restaurant uses at street level and 17 no. two bedroom and 5 no. three bedroom apartments on the floors above including a terrace to each apartment on the southeast elevation facing oriel street upper and on the south elevation facing block o and the formation of window openings and entrances in the existing boundary wall on oriel street upper (protected structure);

block o - one/two storey extension above existing single storey building to be retained to from a two/three storey building providing 765sqm of retail/restaurant space and 2 no. restaurant terraces one on the northern and one southern elevation at first floor level. a 505sqm two storey crèche building and open space within the public space formed by

blocks k and l; 6. a 50sqm single storey retail kiosk building in the public square; 7. the enclosure of the rolling stock maintenance facility and railway sidings beneath the proposed podium structure extending c. 7000sqm. 8. the formation of public open spaces to the east of the new street through the site and between blocks a and b/c and the provision of a pedestrian link between sheriff street lower to the station access road through a courtyard between block a and block b/c; and pedestrian links between the development to oriel street upper; and between oriel street upper to sheriff street lower. 9.

All other site works above and below ground required to facilitate the proposed development including 3 no. 500kw biomass boilers and 2 no. 450kw gas boilers in the basement, 7 no. electricity substations and hard and soft landscaping. the planning application may be inspected or purchased at a fee not exceeding the reasonable cost of making a copy at the offices of dublin city council during its public hours.

An environmental impact statement will be submitted to the city council with the application. The environmental impact statement will be available for inspection or purchase at a fee not exceeding the reasonable cost of making a copy at the offices of the city council during its public opening hours. a submission or observation in relation to the application may be made in writing to the city council on payment of the prescribed fee (20.00) within the period of 5 weeks beginning on the date of receipt by the authority of the application.

The Exo Building

Point Village District Centre, North Wall Quay & East Wall Road

CIS Project ID: 843983

Value: €80,000,000
Planning Stage: Plans Submitted
Floor Area: 22450 m2

A planning application was submitted to Dublin City Council on 15/09/2015 by Grant Thornton for a development at a site of 1.1507 ha at the junction of North Wall Quay and East Wall Road, Dublin 1. The site is bounded by North Wall Quay to the South, East Wall Road to the East, the 3Arena to the West and The Point Village District Centre to the North.

The overall site is located within City Block 5 and 10, as identified in the North Lotts & Grand Canal Dock SDZ Planning Scheme. The development consists of the following: Construction of a commercial office building ranging in height from 8 storeys to 17 storeys (including one level of plant) at the northern end. The total gross floor area above ground of this building will be circa 19263 sq.m. The building is raised at ground level to 8m and supported by three elliptical cores. Access via dedicated northern and southern glass entrance foyers. As part of the development there will be an external roof terrace and plant at eighth floor level. Construction of one level of basement beneath the proposed commercial building connecting to the existing constructed basement beneath the Point Village Square (as constructed under Section 25 DD478) accommodating 300 bicycle parking spaces, plant, staff facilities, storage areas and other associated facilities.

Cycle access to the basement will be via a dedicated, access controlled cycle ramp in the central core. Reconfiguration of the existing basement level -1 beneath the Point Village Square to facilitate 48 No. car parking spaces at -1 level, plant, storage areas and other associated facilities. This will also involve associated structural reconfiguration of existing basement levels -2 and -3. Vehicular access to the basement will be via the existing ramped access on Sheriff St servicing the Point Village District Centre. The reconfiguration of the basement will involve the removal of the existing external stairs from the Point Village Square to existing underground bar located at -1 level. Construction of 14.5m high restaurant/bar glass box with mezzanine level located within the Point Village Square. The total above ground gross floor will be circa. 519.4 sq.m. Permission is also sought for revisions to the Point Village Square Public Realm including proposed hard and soft landscaping works. This includes a new bus shelter, taxi shelter, 5 number glass screens and the relocation of existing Point Village Signage on East Wall Rd. The proposed development includes all associated and ancillary works, including site development works.

Work is expected to take in the region of 24 months to complete

Description

According to recent reports another redevelopment opportunity in Dublin’s south docklands is on the cards following a decision by An Post to sell its 2.3-acre sorting office at Cardiff Lane and relocate to a planned new premises at Ravensdale Road on the opposite side of the quays in East Wall.

The board of An Post has accepted an offer from property developer New Generation Homes to buy the Cardiff Lane facility and replace it with a state-of-the-art mails delivery centre on the north side of the quays.

The deal has been valued at over €40 million by Des Lennon of agents JLL who says the postal service will receive both cash and a new custom-built mail delivery services unit. The precise cash payment has not been disclosed but New Generation is known to have paid €1.9m for the 1.75-acre site at East Wall Road marketed by Ian Lyons of Allsop. New Generation will have to meet the expense of providing a new mail building extending to 1,858sq m (20,000sq ft). The facility is due to be handed over by the spring of 2017.

There should be no undue delay in securing planning permission for the East Road development - the entire docks are now deemed a strategic development zone under the planning regulations for the purposes of speeding up the rejuvenation of both the south and north docklands. New Generation has been steadily buying up mainly housing sites in the greater Dublin area since it was founded in 2011 by brothers Greg and Hugh Kavanagh, and CEO Patrick Crean. The news that they have acquired the Cardiff Lane site will come as a surprise to the main commercial developers who are only too well aware of the pent-up demand for new office space in the docks.

New Generation Homes is financially backed by M&G Investments, an international asset manager which manages over €340 billion in assets for clients across Europe and Asia.

The postal site has mixed-use zoning which will allow for the development of about 9,290sq m (100,000sq ft) of offices and at least 80 apartments.

The site is directly opposite no 2 Grand Canal Square, the Daniel Liberskind-designed block occupied by the William Fry law firm. It is also adjacent to Facebook’s impressive European headquarters and the Bord Gáis Energy Theatre.

This will be the second time An Post has availed of the high values in the docklands to move shop. In the 1990s, it abandoned its sorting office at Sheriff Street to allow developer Brian Rhatigan to extend the International Financial Services Centre.

Website: www.dublincity.ie

Description

A planning application was submitted to Dublin City Council on 17/07/2015 by Dublin City Council - Environment & Transportation Department for proposed point roundabout improvement scheme pursuant to the requirements of the above, notice is hereby given of the proposed construction by dublin city council of the above scheme, consisting of the upgrade to the point roundabout junction to a three-arm signalised junction with a left-turn slip lane from north wall quay to east wall road, dublin 1. This junction will include toucan crossings to accommodate pedestrians and cyclists on north wall quay and the east link bridge. The upgrade of this junction will result in the requirement of a new access arrangement for dublin port to accommodate northbound movements. The scheme proposes to provide a new access to dublin port by providing a fourth arm at the signalised junction of east wall road and sheriff street upper.

This new access will enable the closure of the existing left in left out access to dublin port along east wall road. Additionally, to improve traffic management in the area, it is proposed to widen east wall road to provide an additional northbound lane along with a cycle track and footpath. The additional lane will allow a relatively free flow of traffic from north wall quay onto east wall road while also helping to ease the levels of queuing on the east link bridge. Plans and particulars of the proposed development may be inspected or purchased at a fee not exceeding the reasonable cost of making a copy for a period of six weeks from friday 17th July 2015 to monday 31st August 2015 at the offices of dublin city council, public counter, planning department, block 4, ground floor, civic offices, wood quay, dublin 8, monday to friday 09.00hrs to 16.30hrs.

The proposal can also be viewed at the following location, monday to friday 9.00hrs to 17.00hrs. dublin docklands development authority offices, custom house quay, dublin 1. Plans and particulars can also be viewed online at dublincity.ie. A submission or observation in relation to the proposed development, dealing with the proper planning and sustainable development of the area in which the development would be situated may be made in writing to the executive manager, planning department, Dublin City Council, block 4, floor 3, civic offices, wood quay, Dublin 8 before 16.30hrs on Monday 14th September 2015.
